The collection investigates the main problems of organization and implementation of budgetary policy in Ukraine at the current stage. Factors of implementation of program-target budgeting method are defined. The retrospective policy analysis in budget planning and administration sphere is conducted.

The peculiarities of financial market functioning in modern macroeconomic conditions of Ukraine and their impact on the selection of economic and financial system development model in the post-crisis period are considered. The resource base of financial market and the possibility of its transformation into investment capital for ensuring sustainable development of the real sector of Ukrainian economy is analyzed. The main directions of reforming and basic goals of the long-term state strategy in the sphere of capital markets development are offered.

The state development of innovation infrastructure elements in Ukraine is analyzed and the main problems that hinder its effective formation and development are defined. The key measures to strengthen infrastructure provision of the national economy innovation and technological development are offered.

The collection contains the articles of our colleagues-economists from various scientific and educational institutions of Ukraine.

The author's views concerning certain provisions of the articles may not necessarily reflect the views of the editorial board.
